**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 14 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

There is no support in the specification to support that arteriosclerosis is “inhibited”. This reads on prevention and/or curing it. Without such evidence on the record that this extract actually prevents the disease, the claims should be amended to read “treating” the condition.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1654

Claims 1, 5-7 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Brink.

Brink teaches a weight control product administered to a patient containing the claimed extract, see col. 5-6.

Claims 1, 5, 6, 14 are rejected under 35 U.S.C. 102(b) as being anticipated by CN 1156552, JP 56029522, or FR 2454277.

The references teach administering to a patient a composition for oral use.

Claims 1, 5, 14 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2000095663, JP 2000239164, JP 09295928, JP 2000154134, or Ibnusaud et al.

The references teach administering to a patient a composition containing the claimed extract.

Claims 1, 5, 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Clarke et al.

The references teach administering to a patient a composition containing the claimed extract.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 5-7 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2000095663, JP 2000239164, JP 09295928, Clarke et al., JP 2000154134, Ibnusaud et al., CN 1156552, JP 56029522, or FR 2454277 taken with Brink.

The teachings of the references are above.

It would have been obvious to administer the extract to a patient in a capsule or tablet since Brink makes it clear that such extracts are routinely administered in these forms.
